Dr. W. R. Singleton  
Genetics Society of America  
Brookhaven National Laboratory  
Upton L.I., N.Y.

Dear Ralph:

Although I am sure that Dr. Stadler would make an equally effective, if not a much better, committeeman, I will accept the nomination for a position on the Public Education and Scientific Freedom Committee.

I hope no additional formal statements are needed. If necessary, one may refer to the statement submitted for the previous occasion.

Sincerely,

  
Joshua Lederberg  
Associate Professor of Genetics
